

How to install MariaDB as a service

Click on the start button  and right click on computer and select properties.

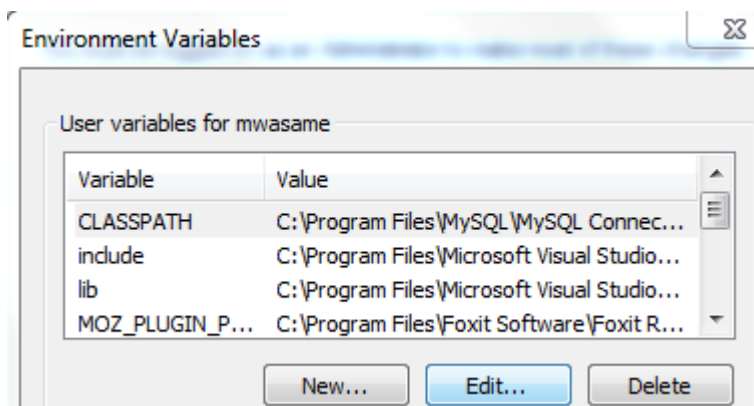

Click on Advanced system settings

Click on Environment Variables

Select CLASSPATH and click edit (if there is no CLASSPATH click on New)

Ensure variable name is CLASSPATH. Under variable value enter

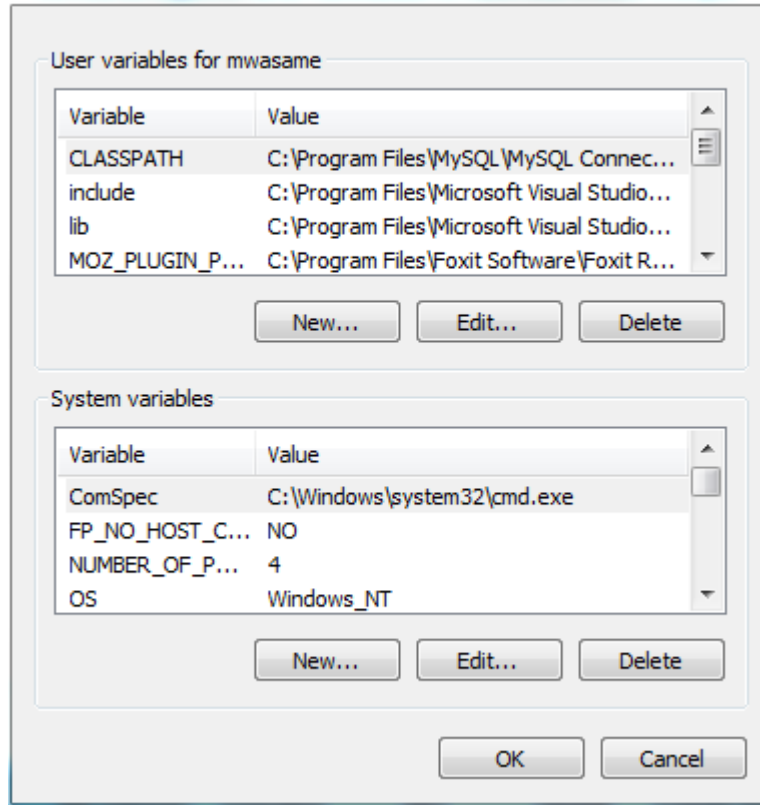

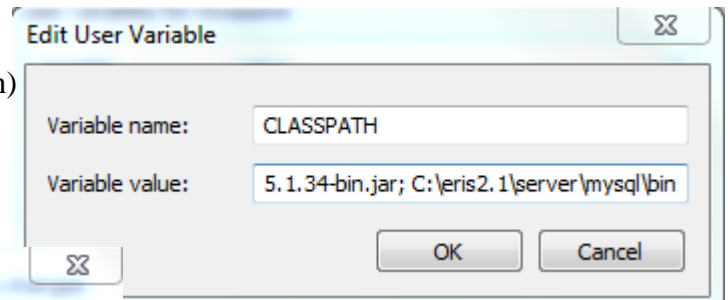

C:\eris2.1\server\mysql\bin

(If another variable value exists, enter a semicolon)

Click ok

Click ok

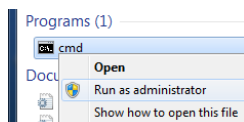

Environment Variables

Click on start button to search and type cmd (for windows 8 and 10, right click start button to access search)

Right click the black cmd icon and click on Run as administrator

Type

`cd C:\eris2.1\server\mysql\bin\`

Press the enter button. Next type:

`mysqld --install`

Press the enter button. This will install MariaDB as a service. Restart windows.
